

CNC – Vertical turning machine

Name of machine:

Pittler PV 1250

Highlights:

- »Multi Head
- »Tool Changer
- »Tools - magazine with 24 tools

Machine Description:

Vertical milling and drilling the well may. The multi-function head can next to the Turning tools driven with 24 edit tools parts total. The PV 1250 is complicated contours produced in every angle. Powerful in the roughing and high precision in the finish.

Work piece spectrum:

Flanges, pulleys, wheels, wheels, brake discs.

Technical details:

- »Piece - diameter up to 1250
- »Piece length to 800 mm
- »Control Siemens 840D

Travel:

1. X = 1250 mm
2. Z = 800 mm
3. Milling and drilling on the circumference to diameter of workpiece 800
4. Positioning of the vehicle control = 0 ° - 270 ° in each angular position
5. Simultaneous milling with the MFK
