

CNC - Vertical turning machine

Machine Name:

Pittler PV 1250 / Y 1-1

Highlights:

- »Multi Head
- »Tool Changer
- »Tools - magazine with 40 tools
- »Y-axis 600mm road

Product image:

Machine Description:

Vertical milling and drilling the well may. The multi-function head can next to the Turning tools also driven editing tools with 40 parts total. The PV 1250 can produce complex contours in every angle. Powerful in the roughing and with high accuracy in the finishing.

Work piece spectrum:

Flanges, pulleys, wheels, wheels, brake discs.

Technical details:

- »Piece - diameter up to 1250
 - »Piece length to 800 mm
 - »Control Siemens 840D
- Travel:
1. X = 1250 mm
 2. Z = 800 mm
 3. Y = +/- 300 mm
 4. Milling and drilling on the circumference to diameter of work piece 800
 5. Positioning of the vehicle control = 0 ° - 270 ° in each angular position
 6. Simultaneous milling with the MFK
